

PUTTING THE FUN BACK
INTO LEARNING!

October 2016

Dear Parents and Guardians,

Graphics is one of the technology subjects. In Graphics students will learn how to represent 3-D objects on paper. They will develop problem solving and creative thinking skills through the solution of graphical problems.

In October they will begin to learn techniques such as:

- how to produce drawings using drawing equipment,
- how to read and interpret drawings and diagrams,
- how graphics relates to the design and manufacture of products.

The main focus this term is to build the students confidence and to develop their affective and psychomotor domain for the subject.

Some of the things you may do in design Technology Graphics lessons are:

- produce neat drawings of everyday items
- use freehand sketching, colouring and shading to represent objects
- make paper/cardboard cut-outs of items and use these to model items in 3-D
- work on your own and as part of a group
- organise and maintain a folder of drawings and notes.

Basic subject introduction

Grade 6:

- Identify all drawing equipment.
- Convert dimensions between Centimeters (CM) and Millimeters (MM)
- Secure and line out page. Borders/ title box.
- Be able to create the UAE National flag.

Grade 7:

- Identify all drawing equipment.
- Understand units of measurement.
- Secure and line out page. Borders/ title box.

- Be able to create a range of National flags.

Grade 8:

- Identify all drawing equipment.
- Understand unit of measurement.
- Secure and line out page. Borders/ title box.
- Be able to create a range of National flags.
- Be able to do basic orthographic projection
